

# Super Meyer Odyssey

*Hop from asteroid to asteroid to collect Power Moons, lest you receive a minor-planet designation. Once you're powered up, get ready to face the final boss ADversary.*

- 1 Exit Hewlett at its southwest corner. Set your sights on Hoover Tower, via Pueblo. As you proceed down the street, you see an imposing building on your right. Note the number of letters you would need to spell out the building's name twice. 
- 2 Descend down 6 steps into the sunken courtyard on your left, next to a Sequoia - remember to eat, drink, and be scary! Note the number of zigs and zags on the sculpture. 
- 3 Wrap around the corner of the building to a place where you would park your bike. Note the number of spokes remaining on the permanent resident of the lot. 
- 4 Head again east, up three steps and straight ahead. Standing to its south, note the building number of the number building. 
- 5 Keep going toward Memorial Court, but stop before you hit a fork in the road! Note the number of red tables in the sunken courtyard to your left. 
- 6 Now take the right fork. Before reaching the arcade, look to your left. Note the interior angle of the octagonal resting area. 
- 7 In the Court, look for a verdigris tint describing motion picture research. Note the year in which the tablet was erected. 
- 8 You're a bit hungry, so you stop for some Burghers. Position yourself so the Burghers are between you and your last objective. Note the number given by the key-holders, using the system you would use if you were struck blind. 
- 9 Heading directly east, stop when you see an underground public fixture for men to your right. I think there are 1000 windows on the left side of the fixture. Note the number by which I've overestimated the true value. 

- 10 Make a beeline to Hoover Tower, passing under a very leafy archway. Right before you impact the base of Hoover Tower, make a right. When the Weather is Fair directly to your left, stop. Note the total number of tall grass plants in the four planters in front of you.
- 11 Continue past the plants. As you walk towards the top of the loading dock ramp, note the number of white umbrellas that appear from behind Hoover Tower.
- 12 Head in the direction of a certain Green Koopa Cafe, but stop when you reach a Big Ram Skull and Horn. Note the year they were born.
- 13 Head now towards Super Mario Crothers. Turn left onto Galvez Mall, but don't stop to go shopping. Note the creation year of a certain space-age-esque sculpture.
- 14 Continue straight ahead until you spy a tower to your right with a big square hole. Note the color pattern of the posts in front of you, as a 5-digit number composed of 1's and 0's (don't convert to binary).
- 15 Walking down the left sidewalk of the street, take a left when you see FDC. But as you keep on going, beware of danger, high voltage! Note the T-number.
